

Hello Ladies!

I just wanted to send out an email with a few photos from Buckhorn's Butterfly Garden :) It has been a HUGE success! I've included some before pictures of the garden prior to any updates, the project itself with all of my awesome volunteers (some of whom are putting in butterfly gardens of their own now!), and some month later shots of how well the plants have done! I hope you enjoy them and thank you so much for being a part of this adventure!

Best news yet! My manager and I just met with a company out of London, KY, who does the fancy, curvy, concrete borders with the neat designs in them to get an estimate for the garden. Because of how the border will need to curve to keep in line with everything else we have in our campground, I get to make the garden even larger!! Which means Tina that I will be getting in touch with you soon to get even more plants for this new section :) I'll give you a heads up once I know when the border will be done.

Thanks again and have a great day! And I've got photo releases for everyone in the shots and I took all the photos so feel free to share publically if you want!
